EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Trudy Wade on 12/13/04.

The application has been amended as follows:

In the title:

The title, in entirety, has been replaced with --MANUFACTURING METHOD OF A SNAP FASTENER--.

In the specification:

Pg 1, first paragraph (continuation data): the phrase --now abandoned,-- has been inserted after "24, 1999"; and the phrase --now US Patent No. 6079083-- has been inserted after "10,1999".

In the claims:

CI 15, ln 2: the phrase "male or" has been deleted.
CI 15, ln 3: the phrase "male or" has been deleted.
CI 17, ln 2: the phrase "snap fastener is a"; and the word "comprising" has been changed to --comprises--.

Claim 18 has been deleted.

The following new claim 19 has been added:

--Manufacturing method of a snap fastener with tape for integrally molding a male button made of synthetic resin on front and back faces of tape such that the male button holds a peripheral edge of an attachment hole of the tape having at least one attachment hole, comprising the steps of:

fixing the tape with the attachment hole in position between cavities of a fixed mold and a movable mold;

closing the movable mold against the fixed mold and clamping a tape portion of the peripheral edge of the attachment hole by at least a pair of clamping members projecting to face each other in the cavities of the molds;

forming an introducing passage for introducing molten resin through a center portion of the attachment hole of the tape and at least one molten resin guide passage for supplying the molten resin linearly from the introducing passage as a center toward the peripheral edge of the attachment hole;

forming an opening of the introducing passage to directly open into a cavity face opposite to a cavity face for molding the engaging portion;

forming in the same opposite cavity face at least one or more molten resin guide passages having at least one wedge-shaped recessed groove with an end communicating with the opening of the introducing passage and a tip end thereof directed to the peripheral edge of the attachment hole of the tape;

Art Unit: 1732

forming the opening of the introducing passage near a plane including the attachment hole of the tape;

injecting the molten resin into the cavity through the molten resin guide passage toward the peripheral edge of the attachment hole of the tape; and

fracturing and removing a molded portion of the introducing passage,

wherein the male member comprises the male button which is in a substantially T-shape in section, and has an engaging portion to be engaged with a female button at a center portion of the male button, and which is molded integrally with the tape.—

2. The following is an examiner's statement of reasons for allowance:

In regard to claim 15, the prior art of record does not teach nor render obvious all of the claimed limitations including the step of connecting.

In regard to new claim 19, the prior art of record does not teach nor render obvious all of the claimed limitations including forming an opening of the introducing passage to directly open into a cavity face opposite to a cavity face for molding the engaging portion; forming in the same opposite cavity face at least one or more molten resin guide passages having at least one wedge-shaped recessed groove with an end communicating with the opening of the introducing passage and a tip end thereof directed to the peripheral edge of the attachment hole of the tape; forming the opening of the introducing passage near a plane including the attachment hole of the tape; injecting the molten resin into the cavity through the molten resin guide passage

Art Unit: 1732

toward the peripheral edge of the attachment hole of the tape; and fracturing and removing a molded portion of the introducing passage.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
